

## Second coordination Meeting of Disaster Medical and Public Health management manual. (2013/5/26)

Location: National Center for Global Health and Medicine (Tokyo)

Title: Coordination of manuals and instruments for medical and public health care management in disaster.

On May 26, (SUN), Second assembly for the coordination of manuals and instruments for medical and public health care management in disaster was held in collaboration with Manual Committee of Japanese Association for Disaster Medicine (Head: Em. Prof. Naruo Uehara).

The meeting was consisted of Manual Committee of JADM, Japan Disaster Medical Assistant Team, Japan Medical Association, Ministry of Health, Labor and Welfare, National Institute of Public Health, National Institute of Infectious Disease, National Research Institute of Global Health, National Center of Neurology and Psychiatry, Health Center Association, Japan Medical Team for Disaster Response, Japan Nurse Association, Japan Public Health Nurse Association, Japan Red Cross, Japan Primary Care Association, Japan Geriatrics Society and IRIDeS.

The discussion was concentrated on how to prevent the occurrence and outbreak of infectious disease at the time of disaster. Especially, it was stressed that first responders should know how to assess and how to use the tools for the assessment and reporting of conditions of evacuation shelters. Scientific analyses of pneumonia in the affected area indicates that lack of lifelines including water, toilet, electricities, gas, food and congestion is a risk factor of outbreak. It was also stressed that common symptoms like fever, cough and diarrhea should be reported immediately and coordinate the preventative manners.

Manuals and guidelines of each society and other societies were surveyed to make a one stop information corner in the site of National Institute of Public Health ([http://www.niph.go.jp/topics/earthq\\_index.html](http://www.niph.go.jp/topics/earthq_index.html)) and Emergency Medical Information System (EMIS) site (<http://www.wds.emis.go.jp/>). Nest meeting will be held in August 11, 2013.

The screenshot shows the homepage of the National Institute of Public Health (NIPH). The header includes the NIPH logo and name in Japanese and English. A navigation menu is visible with options like 'Home', 'Link', and 'Contact Us'. The main content area features a section titled '災害に関する保健医療情報提供サイト' (Disaster-related health and medical information provision site). Below this, there are several links and buttons, including '健康危機情報' (Health Crisis Information) and '保健・看護活動' (Health and Nursing Activities). The page is designed to provide quick access to disaster-related health and medical information.
