

The 4th coordination meeting of disaster medical and public health manuals. (2013/10/20)

Venue: Fukuracia Tokyo Station (Tokyo)

Topics: What should the first medial aid team arrived in evacuation center?

On Oct. 20, Sunday, the 4th coordination meeting was held in Tokyo in collaboration with Japanese Association for Disaster Medicine (Emeritus Prof. Naruo Uehara). We have collected the manuals as much as possible from each medical association and stake holders in disaster response. National Institute of Public Health is collaborating with us to open the disaster information website.

The committee focused on the action of first responders to rapidly assess the medical and public health needs. We confirmed that medical response headquarter should be established within every prefectural headquarter and coordinate the medical and public health management. Risk reduction of vulnerable population in terms of mental health, infectious disease, elderly people, babies and mothers and people who need any assistance. Responsible society and organization was assigned to coordinate the manuals. The diagnostic and treatment manual is going to be organized by Japan primary care association so that first responders could manage the symptoms until subspecialty cares will be provided. Evidence based and realistic manuals are required.

It is most important to assess the medical and public health needs, information sharing and respond effectively. One example is the standardized assessment sheet of evacuation center. Public health nurse are responsible to manage the health condition of each evacuation center as much as possible. The information should be rapidly shared by headquarter. ICT technologies are being established together with printed materials. Continual revising and educational training are required.

Coordination meeting

避難所情報 日報 (共通様式)		活動日 年 月 日	記載者(所属・職名)
避難所活動の目的: ・公衆衛生的立場から避難所での住民の生活を把握し、予測される問題と当面の解決方法、今後の課題と対策を検討する。 ・個人や家族が被災による健康レベルの低下をできるだけ防ぐための生活行動が取れるよう援助する。			
避難所の概況	避難所名	所在地(都道府県、市町村名)	避難者数 昼: 人 夜: 人
	電話	FAX	施設の広さ
	スペース密度 過密・過度・余裕	施設の概要図(屋内・外の施設、連絡系統などを含む)	
	交通機関(避難所と外との交通手段)		
組織や活動	管理統括・代表者の情報 氏名(立場) その他		
	連絡体制 / 指揮・命令系統		
	自主組織	有()・無()	
	外部支援	有(チーム数: 人数: 人)・無() 有の場合、職種()	
	ボランティア	有(チーム数: 人数: 人)・無() 有の場合、職種()	
	医療の提供状況	避難者への情報伝達手段(黒板・掲示板・マイク・チラシ配布など)	
救護所	有・無	巡回診療	有・無
地域の医師との連携		有・無
